now abandoned, the entire contents of which are hereby incorporated herein by reference. --

On page 124, please insert the following structure below the line which states "Profile of Selective A2b Antagonists":

Please amend the abstract of the invention appearing on page 158, lines 4-5 as follows:

-- ~~Novel deazapurines are disclosed which are useful for the treatment of adenosine stimulated diseases.~~

This invention pertains to compounds having the structure:

wherein R₁ and R₂ together form a substituted or unsubstituted heterocyclic ring; R₃ is a substituted or unsubstituted aryl moiety; R₄ is a hydrogen atom, an unsubstituted alkyl, or a substituted or unsubstituted aryl moiety; and R₅ and R₆ are each independently a halogen atom, a hydrogen atom or a substituted or unsubstituted alkyl, aryl, or alkylaryl moiety, or a
